

# Nets and Drawing for Visualizing Geometry Guided Notes

1. The **net** of a 3-D shape is a 2-D shape which can be folded to get the 3-D shape.

2. Number all the faces of this net and fold it in a sequence. Which 3-D shape is made from this net?

**It is the net of a cube**

3. A two dimensional shape having two circular and one rectangular face is the net of a

**Cylinder**.

4. How many triangular shapes does the net of a prism have? Draw the net of a prism.

**A prism has 2 triangular shapes in its net**
