## Points Lines and Planes

Unit 1 Lesson 2

## Points Lines and Planes

## Students will be able to:

- Draw points, lines, line segments, rays, and planes.
- Identify points, lines, line segments, rays and planes.
Know precise definitions of line, and line segment, based on the undefined notions of point, line.

## Points Lines and Planes

## Key Vocabulary: A line, A point, <br> A line segment, <br> A plane, <br> Intersection.

- In geometry, some words, such as point, line, and plane, are undefined terms. Although these words are not formally defined, it is important to have general agreement about what each word means.
- A point has no dimension.
- It is usually represented by a small dot and named by a capital letter.

## Points Lines and Planes

- A line extends in one dimension.
- It is usually represented by a straight line with two arrowheads to indicate that the line extends without end in two directions, and is named by two points on the line or a lowercase script letter.

## Points Lines and Planes

- A plane extends in two dimensions.
- It is usually represented by a shape that looks like a tabletop or wall.
- You must imagine that the plane extends without end, even though the drawing of a plane appears to have edges, and is named by a capital script letter or 3 noncollinear points.

## Points Lines and Planes

- A line segment is a set of points and has a specific length i.e. it does not extend indefinitely.
- It has no thickness or width, is usually represented by a straight line with no arrowheads to indicate that it has a fixed length, and is named by two points on the line segment with a line segment symbol above the letters.

## Points Lines and Planes

- A ray is a set of points and extends in one dimension in one direction (not in two directions). It has no thickness or width, is usually represented by a straight line with one arrowhead to indicate that it extends without end in the direction of the arrowhead, and is named by two points on the ray with a ray symbol above the letters

## Points Lines and Planes

- Collinear points are points that lie on the same line.
- Coplanar points are points that lie on the same plane.

## Points Lines and Planes

## Sample Problem 1: Use the figure to name each of the following.

a.

Line<br>Points<br>Collinear points Non collinear points

## Points Lines and Planes

## Sample Problem 1: Use the figure to name each of the

 following.a.

Line $\overleftrightarrow{A B}$
Points $A, B, C$ and $D$
Collinear points $\boldsymbol{A}, \boldsymbol{B}$ Non collinear points
$A, C, D$

Points Lines and Planes

## Sample Problem 1: Use the figure to name each of the following.

b.

## Line segment Points

Points Lines and Planes

## Sample Problem 1: Use the figure to name each of the following.

b.

## Line segment $\overline{K L}$ Points $\boldsymbol{K}, \boldsymbol{L}$

## Points Lines and Planes

## Sample Problem 1: Use the figure to name each of the

 following.C.

Plane

Ray
Points
Coplanar points
Non coplanar points

## Points Lines and Planes

## Sample Problem 1: Use the figure to name each of the

 following.C.

Plane STO
Ray $\overrightarrow{I R}$
Points $S, T, O, R$ and $I$
Coplanar points $S, T, O$
Non coplanar points $\boldsymbol{R}, I$

## Points Lines and Planes

- Two or more geometric figures intersect, if they have one or more points in common.
- The intersection of the figures is the set of points the figures have in common.

## Points Lines and Planes

- Postulate 1-1 Through any two points there is exactly one line.
- Postulate 1-2 If two distinct lines intersect, then they intersect in exactly one point.
- Postulate 1-3 If two distinct planes intersect, then they intersect in exactly one line.
- Postulate 1-4 Through any three non collinear points there is exactly one plane.

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

a.

Name the intersection of line $\overleftrightarrow{\boldsymbol{Q Z}}$ and segment $\overline{\boldsymbol{W} \boldsymbol{U}}$.

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

a.

Name the intersection of line $\overleftrightarrow{\boldsymbol{Q Z}}$ and segment $\overline{\boldsymbol{W} \boldsymbol{U}}$.

Point $T$

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

a.

Name the intersection of plane $\boldsymbol{\pi}$ and line $\overleftrightarrow{\boldsymbol{D} \boldsymbol{B}}$.

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

a.

Name the intersection of plane $\boldsymbol{\pi}$ and line $\overleftrightarrow{\boldsymbol{D} \boldsymbol{B}}$.

Point $\boldsymbol{S}$

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

a.

Name the two opposite rays at point $\boldsymbol{T}$.

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

a.

Name the two opposite rays at point $T$.
$\overrightarrow{\boldsymbol{T Q}}$ and $\overrightarrow{\boldsymbol{T} \boldsymbol{Z}}$

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

a.

What is another name for plane $\boldsymbol{\pi}$ ?

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

a.

What is another name for plane $\boldsymbol{\pi}$ ?

Plane $\boldsymbol{T S U}$

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

b.

Name the intersection of plane $\boldsymbol{\pi}$ and plane $\boldsymbol{\tau}$.

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

b.

Name the intersection of plane $\boldsymbol{\pi}$ and plane $\boldsymbol{\tau}$.

## Line $\overleftrightarrow{\boldsymbol{B S}}$

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

b.

What is another name for plane $\boldsymbol{\pi}$ ?

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

b.

What is another name for plane $\boldsymbol{\pi}$ ?

Plane $\boldsymbol{L M G}$

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

b.

Name the intersection of line $\overleftrightarrow{\boldsymbol{M G}}$ and line $\overleftrightarrow{\boldsymbol{B S}}$.

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

b.

Name the intersection of line $\overleftrightarrow{\boldsymbol{M G}}$ and line $\overleftrightarrow{\boldsymbol{B S}}$

Point $\boldsymbol{C}$

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

b.

Name a point that is collinear with $\boldsymbol{M}$ and $\boldsymbol{C}$.

Point $\boldsymbol{G}$

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

Name the intersection of plane $\boldsymbol{\pi}$ and line $\overleftrightarrow{\boldsymbol{L} \boldsymbol{C}}$.

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

Name the intersection of plane $\boldsymbol{\pi}$ and line $\overleftrightarrow{\boldsymbol{L} \boldsymbol{C}}$.

Point $C$

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

Name the intersection of plane $\boldsymbol{\tau}$ and line $\overleftrightarrow{\boldsymbol{L} \boldsymbol{C}}$.

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

Name the intersection of plane $\boldsymbol{\tau}$ and line $\overleftrightarrow{\boldsymbol{L} \boldsymbol{C}}$.

Point $\boldsymbol{L}$

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

Name a point that is coplanar with $\boldsymbol{H}$ and $\boldsymbol{L}$.

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

Name a point that is coplanar with $\boldsymbol{H}$ and $\boldsymbol{L}$.

Point $\boldsymbol{P}$

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

Name the opposite ray of ray $\overrightarrow{\boldsymbol{C B}}$.

## Points Lines and Planes

## Sample Problem 2: Refer to each figure.

Name the opposite ray of ray $\overrightarrow{\boldsymbol{C B}}$.

Ray $\overrightarrow{\boldsymbol{C J}}$

## Points Lines and Planes

## Sample Problem 3: Draw and label figure for each relationship.

a. - Plane $\boldsymbol{A B S}$ contains lines $\overleftrightarrow{\boldsymbol{A B}}, \overleftrightarrow{\boldsymbol{C D}}$, and $\overleftrightarrow{\boldsymbol{A K}}$.

- Lines $\overleftrightarrow{\boldsymbol{A B}}$ and $\overleftrightarrow{\boldsymbol{C D}}$ intersect in point $\boldsymbol{G}$.
- Lines $\overleftrightarrow{C D}$ and $\overleftrightarrow{A K}$ intersect in point $\boldsymbol{S}$.
- Lines $\overleftrightarrow{\boldsymbol{A B}}$ and $\overleftrightarrow{\boldsymbol{A K}}$ intersect in point $\boldsymbol{A}$.

## Points Lines and Planes

## Sample Problem 3: Draw and label figure for each relationship.

a. - Plane $\boldsymbol{A B S}$ contains lines $\overleftrightarrow{\boldsymbol{A B}}, \overleftrightarrow{\boldsymbol{C D}}$, and $\overleftrightarrow{\boldsymbol{A K}}$.

- Lines $\overleftrightarrow{\boldsymbol{A B}}$ and $\overleftrightarrow{\boldsymbol{C D}}$ intersect in point $\boldsymbol{G}$.
- Lines $\overleftrightarrow{\boldsymbol{C D}}$ and $\overleftrightarrow{\boldsymbol{A K}}$ intersect in point $\boldsymbol{S}$.
- Lines $\overleftrightarrow{\boldsymbol{A B}}$ and $\overleftrightarrow{\boldsymbol{A K}}$ intersect in point $\boldsymbol{A}$.

## Points Lines and Planes

## Sample Problem 3: Draw and label figure for each relationship.

b. - Plane $\boldsymbol{\pi}$ contains line $\overleftrightarrow{\boldsymbol{A B}}$ and point $\boldsymbol{L}$.

- Plane $\boldsymbol{\tau}$ contains line $\overleftrightarrow{\boldsymbol{E F}}$ and point $\boldsymbol{S}$.
- Lines $\overleftrightarrow{\boldsymbol{A B}}$ and $\overleftrightarrow{\boldsymbol{E F}}$ intersect in point $\boldsymbol{H}$.
- The intersection of plane $\boldsymbol{\pi}$ and plane $\boldsymbol{\tau}$ is line $\overleftrightarrow{\boldsymbol{L}} \boldsymbol{U}$.

## Points Lines and Planes

## Sample Problem 3: Draw and label figure for each relationship.

b. - Plane $\boldsymbol{\pi}$ contains line $\overleftrightarrow{A B}$ and point $\boldsymbol{L}$.

- Plane $\boldsymbol{\tau}$ contains line $\overleftrightarrow{\boldsymbol{E F}}$ and point $\boldsymbol{S}$.
- Lines $\overleftrightarrow{\boldsymbol{A B}}$ and $\overleftrightarrow{\boldsymbol{E F}}$ intersect in point $\boldsymbol{H}$.
- The intersection of plane $\boldsymbol{\pi}$ and plane $\boldsymbol{\tau}$ is line $\overleftrightarrow{\boldsymbol{L}} \boldsymbol{U}$.

## Points Lines and Planes

## Sample Problem 3: Draw and label figure for each relationship.

c. - Plane $\boldsymbol{\pi}$ and plane $\boldsymbol{\tau}$ do not has intersect.

- Plane $\boldsymbol{\varepsilon}$ intersect plane $\boldsymbol{\pi}$ in line $\overleftrightarrow{\boldsymbol{B C}}$.
- Plane $\boldsymbol{\varepsilon}$ intersect plane $\boldsymbol{\tau}$ in line $\overleftrightarrow{\boldsymbol{E R}}$.

## Points Lines and Planes

## Sample Problem 3: Draw and label figure for each relationship.

c. - Plane $\boldsymbol{\pi}$ and plane $\boldsymbol{\tau}$ do not has intersect.

- Plane $\boldsymbol{\varepsilon}$ intersect plane $\boldsymbol{\pi}$ in line $\overleftrightarrow{\boldsymbol{B C}}$.
- Plane $\boldsymbol{\varepsilon}$ intersect plane $\boldsymbol{\tau}$ in line $\overleftrightarrow{\boldsymbol{E R}}$.
