$\qquad$
$\qquad$

## Use Parallel Lines and Transversals Guided Notes

1. Two lines are parallel if they $\qquad$ intersect each other. The two lines given below are $\qquad$ .

2. A $\qquad$ is a line which intersects two or more coplanar lines.

3. The sum of two complementary angles is always $\qquad$ . The value of $x$ in the figure below is $\qquad$ _.

4. The sum of two supplementary angles is always $\qquad$ The value of y in the figure below is $\qquad$ .

5. The angles formed when two lines intersect each other are called $\qquad$ .

$\qquad$ Date: $\qquad$

## Use Parallel Lines and Transversals Guided Notes

6. The vertical angles are always $\qquad$ . The value of z in the figure below is
$\qquad$ _.

7. If a transversal intersects two parallel lines, then the alternate angles formed are
$\qquad$

8. The corresponding angles are congruent if the transversal intersects two $\qquad$ lines.

9. The sum of two interior (or exterior) angles on the same side of the transversal is $\qquad$ _.
