$\qquad$ Date: $\qquad$

## Thanksgiving Color Match Activity congruence in right triangles

Directions: Answer the questions. Find your answer on the Thanks-Giving Turkey. Then color according to your answers.

1. Two triangles are congruent if they have same shape and $\qquad$ . (ORANGE)
2. If the hypotenuse and leg of one right triangle is congruent to the hypotenuse and corresponding leg of another triangle, the two triangles are $\qquad$ . (RED)
3. What is the value of $x$ in the figure given below? (PURPLE)

4. What is the value of $y$ in the figure given below? (YELLOW)

5. What is the value of $a$ in the figure given below? (BROWN)

6. If the legs of one right triangle are congruent to the corresponding legs of another triangle, the two triangles are congruent by $\qquad$ postulate. (PINK)
7. What is the value of $b$ in the figure given below? (GREEN)

8. What is the value of $x$ in the figure given below? (SKY BLUE)

9. What is the value of $y$ in the figure given below? (LIGHT GREEN)

10. What is the value of $z$ in the figure given below? (GREY)
