## Proofs with Uno Assignment

Part 1
Using the techniques discussed in class. Prove each problem by using some or all of the cards mentioned in the problem. Complete a two-column proof for each exercise, with statements and reasons in the columns. A reason is needed for each statement. The final statement will be the item being proved.

## Example:

Given: Yellow 4

In your hand you have Red 4, Blue Draw 2, Blue Skip, Green Skip and Green 4.
Prove: Blue Draw 2

| Statement | Reason |
| :--- | :--- |
| Yellow 4 | Given |
| Green 4 | Same Number |
| Green Skip | Same Color |
| Blue Skip | Same Symbol |
| Blue Draw 2 | Same Color |

All cards could have been played with an additional step by starting the proof with the Red 4.
